

REMARKS

The enclosed electronic copies of the Sequence Listing include no new matter that goes beyond the original application as filed, but are supplied to fulfill the requirements as outlined in the Communication from the Examiner dated February 28, 2007. The sequences contained in the Sequence Listing were originally disclosed in tables filed on CD-ROM with International Application No. PCT/US03/28226. For further information, please see page 1 of International publication WO 2004/04000.

Due to the prohibitive length of supplying the Sequence Listing in paper form, the Sequence Listing on CD-ROM in lieu of paper copy is supplied herewith. Accordingly, the application has been amended to insert the paragraph regarding the statement of the Sequence Listing being submitted on CD-ROM immediately after the title of invention. All other amendments are merely renumbering oligonucleotides to correct for duplicate usage of SEQ ID numbers in the specification. These amendments do not introduce any new matters. Applicants respectfully submit that the above-identified application is now in compliance with 37 C.F.R. §§ 1.821-1.825 and WIPO Standard 25.

Respectfully submitted,

SEED Intellectual Property Law Group PLLC
